- **Databases** - MongoDB.
- **Programming Languages** - Javascript, C, C++, Java, Python.

Projects:

[\[Google Clone\]](#) Google Clone - Full Stack

Tech Stack - Next.js, Tailwind Css.

- Created a Google clone with a dynamic interface, familiar environment, pixel perfect design.
- Features lightning-fast loading and responsive design for optimal usability.

[\[Nexus Meet\]](#) Video Calling Application - Front End Development

Tech Stack : Next.js, Tailwind CSS.

- Implemented secure and personalised user management using Clerk for authentication.
- Integrated Stream's SDK to enable high-quality video calling capabilities, offering seamless virtual meetings and collaborations.

[\[Western Fiber\]](#) – Freelance Project (Full Stack Development)

Tech Stack : ReactJs, Tailwind Css.

- Designed and developed a complete website for Western Fibers independently.
- Focused on creating a modern and user-friendly interface that aligns with the company's branding.

[\[Rights Info India\]](#) – Blog Site (Side Project)

Tech Stack : Astro.

- A project aimed at educating people about their rights in India.
- Developed a minimalistic website with a color palette featuring Slate Gray, Silver, and Off-White.
- Implemented sections to display blog posts and a contribution page for community involvement.
